

e-RICELAB can provide on request below types of rice inspection & loading facilities to our valued clients. However, if you don't find any desired services below, do send us your particular requirement to consider:

❖ **Rice Inspection, Sealing & Sampling**

We can perform inspection of rice, can seal the lot for a specific period of time and can draw samples according to EU regulations as per our client's requirement. These samples can be sent to the client for his observation and approval.

❖ **Rice Inspection, Sealing, Sampling & Analysis**

We can perform rice analysis in addition to all services being provided above. A complete analysis report can be then sent to our client for his observation/approval.

❖ **Rice Inspection & Loading**

We can perform loading in addition to above all in case we found our client's approval to load the material. Digital pictures are drawn at all levels of loading and prior to loading container conditions are thoroughly checked, approved and then loaded.

A complete loading report with digital pictures sent to our client immediately after loading. Containers are always sealed with our own **e-RICELAB Plastic Seal**.

❖ **Rice Packing Material Inspection**

We do also complete packing material inspection such as:

- Uniformity in packing stuff, such as cotton, plastic, paper, jute, wpp material
- Uniformity in printing color (s)
- Uniformity in dimension of printing area
- Uniformity in write-up necessary to be printed on each bag

❖ **Weight Inspection**

- Individually weight of bag
- Empty weight of bag
- Container weight at electronic weighbridges
